

# What is your Life Purpose?

by Jena Griffiths

“What’s my purpose? How can I find fulfilment?” “What’s stopping me?”  
Surprising as it may seem, these questions can be answered by exploring the patterns on your fingerprints.

Your fingerprints are totally unique. They are an energetic blueprint that precedes your life experience. Your fingerprints reveal your life purpose and your life lesson.

This method is based on the LifePrints system by Richard Unger. It has helped hundreds of thousands of people unlock their purpose, and it can help you too.

## How does it work?

We look at your fingerprint “pattern intensity” across all 10 fingerprints and occasionally also in the palm. Broadly speaking, the location of your most complex fingerprint pattern reveals your life purpose. And the location of your least complex print/s show your life lesson.

And, how do we determine complexity?

We look for **how many triradii** (junction points) there are in each of your fingerprints

Are there 0, 1 or 2 triradii?

0 triradii = least complex

2 triradii = most complex

Here is an example of a fingerprint with **1 triradius**

Now compare these 4 fingerprints with 0, 1 or 2 triradii.

Using a process of elimination, we look for which finger has the most pattern intensity. Then we look to see what that particular finger means.

Let's try this now on your fingerprints. Look at the various patterns on all ten of your fingertips. For best results, use a magnifying glass and direct sunlight.

## Step 1

Do you have any fingerprints with 2 triradii and a spiral pattern in between?  
(maximum pattern intensity)

Here are two examples. These prints are called “whorls” and have a central core and below it, two triradii, one on either side.

If you have fingerprints like this, note which finger they are on.

Are they on the right hand or left hand? Then which finger?

Are they on the thumb, index, middle, ring or little finger ?

(Now turn to page 6 to see the meaning of each fingerprint location.)

**Step 2** If you don’t have any whorls (fingerprints with 2 triradii), look to see if you have any prints with 1 triradius. The triradius could be right on the side of the print or in the middle.

or

Now check to see if the triradius on one side, or is it right in the middle of the fingerprint?

First look for prints where the triradius is right on the side of the fingerprint.  
Do you have any like these below?

If so, note their finger location and turn to page 6 for the meaning. If you have more than 6 of these prints then don't look at the location. Love and connection is your deepest fulfilment point.

What if you don't have any of the above?

Then try **Step 3**

Look for 1 triradius right in the center.

Note which finger/s it is on and then turn to page 6 for the meaning of this exact finger location.

Here are a few variations of prints with one central triradius

What if you have no triradii?

If you have no triradii whatsoever on all 10 fingerprints, this is quite rare but not impossible. If this is you, no need to look at the chart on page 6. This type of fingerprint indicates that your whole life is about finding peace. It is both your purpose and your lesson.

Below are a few examples of **prints with 0 triradii**.  
Notice the gentle wave pattern on all of them.

## Decoding purpose from the 10 fingerprint locations

Once you have located your most complex fingerprint/s, look to see what the location of these prints says about your life purpose.

Right thumb - success, the doer, manifesting something tangible in the world.  
Right index finger - the leader, taking authority, showing up as a person of influence  
Right middle finger - business, adding commercial value to other people's lives  
Right ring finger - the artist or individualist. Being visible or in the spotlight.  
Right little finger - the author or speaker, man or woman with a message.

Left thumb - family or building community  
Left index - living fully and passionately  
Left middle - the mentor, wise elder or teacher of self worth and integrity  
Left ring - the innovator who dares to be different, converting the sceptics.  
Left little - the healer or inspirational communicator

Your purpose can include a combination of fingers and be more complex than this single finger description. And you also have one or more fingerprints representing your lesson.
